INFORMAÇÃO TÉCNICA / INFORMACIÓN TÉCNICA / TECHNICAL INFORMATION / INFORMATIONS TECHNIQUES

1 - Carrossel  0.25m

Panels

HDPE: High density polyethylene mono or two color. Being a polymer is characterized by its resistance to chemicals and corrosion. Due to its elasticity and lightness, it offers high impact resistance and is very difficult to break. The non-slip surface provides safety for children and its synthetic base prevents the growth of bacteria and fungi. It does not require any maintenance;

Metal Pieces

Pipes: Hot dip galvanized steel according to EN ISO 1461. Lacquer enamel Type gel at 230°C, with thickness between 50 and 70µm, according to the standard UNE EN ISO 2808;

Fixation System:

Type C – Standard composed of plumbing applied directly to the ground and cast with concrete;

Bearings:

Conical – With conical inner and outer ring tracks and conical rollers. They are suitable for supporting combined loads, ie axial and radial loads acting simultaneously. The lines of projection of the tracks converge at a common point on the axis of the bearing to offer authentic rolling movement and low friction;

Screws and accessories

Screws: Zinc-plated steel or, optionally, AISI 304 stainless steel;

Capsules: PP polypropylene plastic;

Fun

While having fun, children acquire immense abilities, from physical abilities to social interactions.

Socializing

Socialization and imagination are necessary throughout the game. All this creates a relationship between children and awakens the sense of coexistence and solidarity.

Play

Develops patience, sharing and sporting spirit.

Rotate

Provides a sense of freedom. Improves body control, balance and coordination.
