- 1 - Rede Escalada 2,50m
- 2 - Escorrega Turbo 1,90m
- 3 - Travessia Escada 1,90m
- 4 - Escada Degraus 1,90m

Panels

HDPE: High density polyethylene mono or two color. Being a polymer is characterized by its resistance to chemicals and corrosion. Due to its elasticity and lightness, it offers high impact resistance and is very difficult to break. The non-slip surface provides safety for children and its synthetic base prevents the growth of bacteria and fungi. It does not require any maintenance;

Net

Ø16mm strands reinforced in steel covered by polypropylene fibers, HDPE plastic attachment and attachment accessories with UV protection, hot galvanized steel fastening elements;

Metal parts

Tubes:

Iron: Anticorrosive hot dip galvanizing treatment according to EN ISO 1461. Gel enamel lacquering at 230°C, with thickness between 50 and 70µm, according to the standard UNE EN ISO 2808;

Fixation System

Type C – Standard fixing system composed of plumbing applied directly to the ground and cast with concrete;

Screws and accessories

Screws: Zinc-plated steel or optionally AISI 304 stainless steel;

Capsules: PP polypropylene plastic;

100%

FUNÇÕES LÚDICAS/ FUNCIONES LÚDICAS / RECREATIONAL FUNCTIONS / FONCTIONS RÉCRÉATIVES

Fun: While having fun, children acquire immense abilities, from physical abilities to social interactions.

Socialize: Socialization and imagination are necessary throughout the game. All this creates a relationship between children and awakens the sense of coexistence and solidarity.

Play: Develops patience, sharing and sporting spirit.

Climb: It develops children's motor skills, body control, balance and coordination, stimulating motor ability and strength in movements.

Slide: The sloping surface allows the child to slide at high speed. The sensation of speed makes them feel alive and learn to control their movements by exercising reflexes and motor skills.
