Material

All metal parts are made of stainless steel 304. Floors and walls have a 'wooden' base and the whole is covered with a durable plastic coating. Connections consist of stainless steel and are, where necessary, covered with a plastic cap.

Anchorage

The posts go to a depth of 50 cm in the ground and at the bottom a steel plate to increase the support.

Comments

If the soil does not contribute to the stability it may be necessary to add concrete.
