Playfunctions

Education, balancing, sliding, combination equipment, sandplay, role play

Material

Stands are made of Rebo recycled material which is coloured black. Floors are made of LDPE and Rebo. Panels are constructed of HMPE. The slide is made of fibreglass reinforced coloured polyester. Nuts and bolts are covered by coloured plastic caps. The bucket is made of rubber and attached by a short link chain made of stainless steel. The gutters are made of glass/fibre protected polyester.

Anchorage

The posts are anchored into the ground with galvanized steel ground anchors. These go to a depth of 50 cm in the ground and are attached to the underside with a plate to increase the support. Concrete is not required.

Comments

When the soil does not contribute to the stability, it may be necessary to add concrete.
