Playfunctions

Education, balancing, sliding, climbing equipment, combination equipment, climbing, role play, climbing wall

Material

Poles are made of aluminium. The top is covered with a roof or a pole cap. Floors are completely recyclable and have a anti/slip profile. Climbing walls and panels are made of an outdoor quality colored 19 mm thick HMPE. Slides are made of glass reinforced polyester. All metal parts are powder coated aluminium. Connections are, where necessary, covered with a plastic cap. Nets and ropes are made of 16 mm vandal proof Hercules rope.

Anchorage

The posts go to a depth of 50 cm in the ground and are attached to the underside with a plate to increase the support. Concrete is not required.

Comments

When the soil does not contribute to the stability, it may be necessary to add concrete.
