Playfunctions

Balancing, climbing

Material

Poles are made of an recycled plastic. The top is covered with a pole cap. All metal parts are powder coated aluminum. Connections are, where necessary, covered with a plastic cap. Nets and ropes are made of 16 mm vandal proof Hercules rope.

Anchorage

The posts are anchored into the ground with galvanized steel ground anchors. These go to a depth of 40 cm in the ground and are attached to the underside with a plate to increase the support. Concrete is not required.

Comments

When the soil does not contribute to the stability, it may be necessary to add concrete.
